

TSS COVID UPDATE

WE'RE MAKING FACE SHIELDS

TSS has always paid great attention to the needs of our clients, employees and the people around us.

Without forgetting our roots in the automotive industry, but focusing on common welfare, TSS has decided to join the fight against [COVID 19](#)

Consequently, we have decided to divert our efforts into producing foam parts to be used in face shields.

With the capability to slit die cut, TSS can produce a foam of piece of nearly any shape or size.

As such, we hope to make an impact and help our healthcare workers on the frontlines as best we can.

OUR FACE SHIELDS

Thanks to their versatile design and high performance foams, our face shields are made with high quality, flame retardant and non irritant PUR foam along with high impact PET and Velcro reinforcement.

These masks provide excellent comfort, protection and visibility.

- Ultra-soft Polyurethane Density 30kg/m³
- Prevents chemicals, saliva droplets, and paints from splashing into the face
- Ideal for long periods of time
- Clear Wide Visor
- Fully Adjustable
- Anti fogging
- PUR 30 mm thickness
- Self extinguishing
- Extremely lightweight
